

32.50 STABILISATION

sateco

NOUS AVONS UN MONDE À BÂTIR

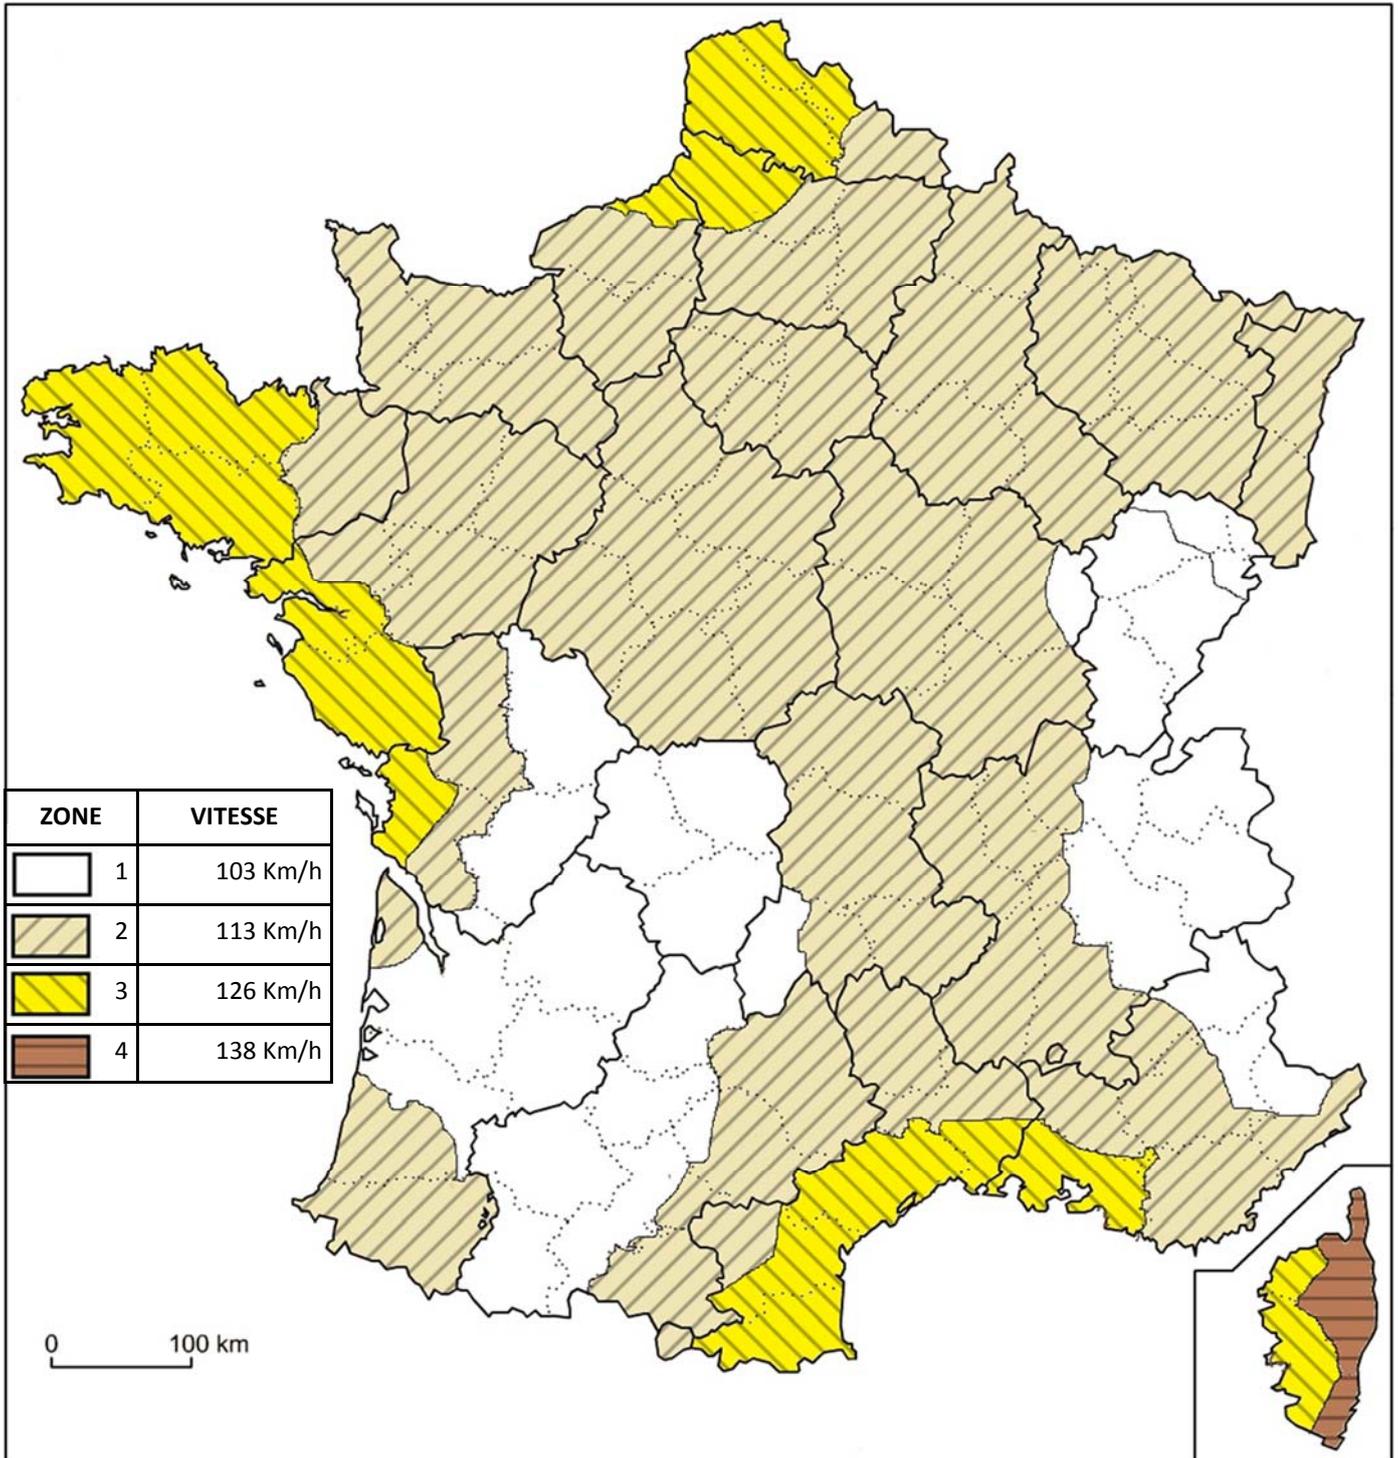

Les 2 types de stabilisation

1. Par portique, voir planche 32.50.13

Stabilisation applicable pour des vents < 85Km/h, conformément à la norme NFP 93.350.
 Voir tableau chapitre levage pour connaître les cas d'utilisation des portiques

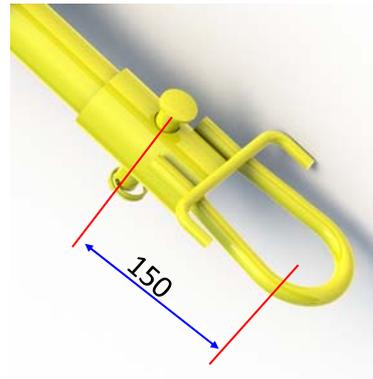

2. Par lest ou ancrage, voir planches 32.50.05 à 32.50.12

Stabilisation avec ou sans lest, modulable en fonction de la carte des vents (ci-dessous) et selon les préconisations SATECO.
